Good Afternoon Len and Bill:

In preparation for our assessment next Tuesday inside the Greater Niagara Building, below are questions raised by our subcontractor. Please review our responses and add to our answers please.

- 1) Is there a underground utility site map ? **Len, as property owner, do you have an underground utility diagram/map?**
- 2) Inside the building, is there electric **(Yes)**, storm **(unknown)**, sewer under the floor **(unknown)**. **Please let us know about storm water system and sewer underneath the Greater Niagara Building**
- 3) Is the floor concrete **(Yes)**? It will make a difference if we have to use GPR.
- 4) Are the areas marked and how large of an area are we locating? **The locations are marked on the attached figure, but they will be physically marked out during the sampling event. The utilities will be located within the immediate vicinity of the proposed soil boring location.**
- 5) Could the (utility locating) job be done on Saturday, February 27 or Sunday, February 28? Access **Access will only be possible on those days with property owner approval and property owner presence during utility location work. Len and Bill please let me know if you approve the utility location work being performed on or Sunday with facility personnel present?**

Thanks
